

DUAL MASTER 3000iR

Reliable. Unsurpassed warranty

Safe. Ergonomically designed for operator safety

Accurate. Delivers a clean cut to exceptional tolerances

Value. Offers substantial whole-life cost savings

Speed. Spin to relief in under 60 seconds

Versatile. Use with any make, type and size of mower

Ease. Let the machine work for you

The Dual Master 3000 iR integrates the dual functions of spin and relief grinding where regular relief grinding is important to return cutting units to manufacturer's specification.

Building on the technical foundations of the renowned Express Dual and Anglemaster system, the Dual Master 3000 iR incorporates auto-indexing relief to deliver the fastest, easiest and most accurate spin and relief grinding.

With the ability to change from spin to relief or relief to spin in under 60 seconds the Dual Master 3000iR can save time in the workshop leaving you free for other duties.

- Auto-index relief
- Hoist fitted as standard
- Manual clamp system
- Rapid stone change
- Automatic traverse
- Independent end feed alignment
- Variable reel speed
- Integral task light
- Single point infeed advance
- Rigid, robust chassis
- Comprehensive guarding
- Vacuum system as standard
- Options: **Express Lift table**

Guarding System

The Dualmaster safe guarding system cuts down on noise and pollution, providing minimal interference with machine operation.

Auto-index

Auto-index (patent pending) allows unattended operation for automatic relief grinding.

Quick reference scales

Calibration scales enable repeatable set up of cutting units for rapid set up.

Relief angle gauges

Set of angle finder gauges to return the cutting unit to manufacturer's specification.

Multi-alignment points

Facilitates fast and simple reel alignment.

Supplied with all tools and accessories

Comprehensive set of tools, brackets and parts.
